# MESSAGE FROM THE DESIGNER

---

Thank you so much for supporting my design that I submitted to the AFOL Designer Program! The LEGO® Story features the different eras of LEGO's history, which I thought would be a great way to celebrate the 60th anniversary of the small plastic bricks. Like many other adult fans of LEGO, I was also always interested in the LEGO manufacturing process and the company's history. That's why I decided to design a set like this.

I wanted to build the most important details from LEGO's history that include the wooden duck, the first milling and moulding machine, a LEGO designer's office with the micro LEGO builds, and the modern factory with a big automated moulding machine and pipework. I also included some interesting building techniques in each small scene.

All in all, I hope you will enjoy building this model!

**Jónás Kovács**  
BrickJonas

I collect Modular Buildings because my dream is to build a big LEGO city. I also started exploring 3D rendering and animation, so I make short LEGO animations when time allows.

# THE LEGO® STORY

---

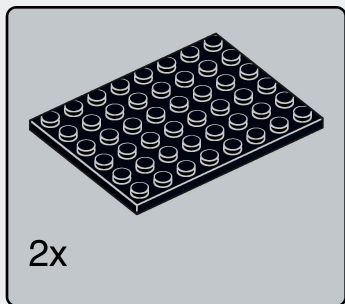

Since it's the 60th anniversary of LEGO Brick, what's a better way to celebrate than taking a look back at how it all started? Build an individual vignette for 4 different eras of LEGO's history starting from 1937. Ole Kirk Kristiansen bought his first milling machine, and the company only made wooden toys (have you spotted the wooden duck?). In the second vignette, LEGO started molding plastic bricks in 1946. The third vignette is of a designer's office to represent designers working on the amazing LEGO sets that we all are familiar with. Finally, in the fourth vignette, you can see a modern molding machine with a complicated tubing system in the background. That's where the raw materials "travel" to the big molding machines that make LEGO bricks.

Display all the vignettes together, or put them in different places, to share the story of LEGO!

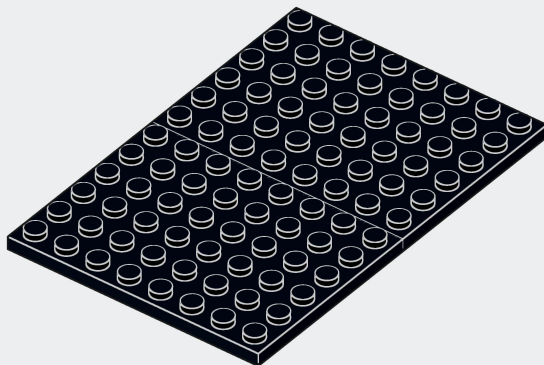

To provide a better building experience, the parts in this set are divided into stages. Stage numbers are marked on each bag (e.g. 1A, 1B, etc) and at the appropriate place in the instructions. All bags beginning with the numeral one should be opened first. After the first stage is built, open bags from the second stage and so on.
